something that we must mention is that this tool has a limit of one use per day so you should think carefully about the number of resources you want for your account even so you can return later to repeat this process as many times as necessary compared to flying taking a bus or train can be more cost effective convenient and sustainable it s not always possible to avoid flying but consider which flights you take some flights pollute less than others i love this game the only thing i can t get to grips with is that it seems that the timers restaurant speed boat museum etc don t seem to move unless you are on the actual game once you played all your moves who s going to sit with the app open until it reloads not me and some of the timers the wait time in them is far too long and if you want to skip waiting it s far to expensive i expect to get board of this game eventually the other thing the shop where you can purchase stuff you should be able to purchase other items like painting from the museum i ve cream and desserts it seem that aspect of the game is still stuck at level one offering only sand castles shells and food from the basket that also goes the same for chests as you progress further in the game people ask for other stuff that s not level one stuff sand bucket basket but that s what you are being rewarded with eventually you will end up with a board filled with stuff you don t need also it would be good if you could sell

the sand buckets or picnic baskets i don t need like 10 of them spec when the people are asking for other things from other places another great feature would be if you could give the item to the person freeing up some space on the board until those order is completed all in all the game is a great concept and i do enjoy playing it thanks for your hard work everyone the company initially prioritised android because it s easier to launch a project marketing wise but as of today the downloads and revenue are distributed almost equally between ios and android that s a typical pattern in the industry for instance love pies sales are split between the platforms 50 50 while merge mansion and gossip harbor net more revenue from ios
